

A+DVANCER ONLINE COURSES TO PREPARE FOR THE PLACEMENT TEST

ELEMENTARY ALGEBRA: 23 lessons

include: number line, absolute value operations on real number lines, evaluating algebraic expressions, solving linear equations, applied problems, properties of exponents, scientific notation, addition, subtraction, multiplication of polynomials, algebraic fractions, roots and radical, solving quadratic equations, etc. This course is intended for students who completed Algebra II in high school but need to refresh their skills.

READING COMPREHENSION: 21 lessons include: contrasting and contradictory statements, logic, main and less central ideas, organizing principles, inferences, and more.

ARE A+DVANCER COURSES RIGHT FOR ME?

These courses are designed to refresh the knowledge you already have. If you are a self-starter and motivated to improve your placement test scores, these online courses are for you. Access to a computer with internet is required.

HOW WILL THE COURSES HELP ME?

The A+dvancer courses are meant for those students who need to BRUSH UP on their reading and elementary algebra skills. After taking a pretest to assess your current skill level, the program will designate a prescribed course where you will review and refresh your skills. You will work on test questions similar to what you will see on the placement test for LSC.
