

Lake Superior College

College-wide Outcomes

College-wide Outcomes are the six general standards that serve as the foundation for education at LSC.

1. Computer and Information Literacy – The student will be able to:

- Use a computer and its software to accomplish practical tasks
- Determine when there is a need for information, and identify, locate, evaluate, and effectively use that information for the issue or problem at hand

2. Communication – The student will be able to:

- Demonstrate the ability to interact collaboratively within a group to complete an assigned task
- Describe how human diversity affects communication
- Deliver a clear, well-organized verbal presentation
- Compose a clear, well-organized document that is professional in appearance and content

3. Self-development – The student will be able to:

- Set personal and professional goals and develop strategies to reach them
- Describe techniques to attain realistic levels of personal health and wellness
- Describe the benefits of life-long learning

4. Critical Thinking – The student will be able to:

- Gather pertinent factual information and apply it to a given problem
- Explore possible assumptions, interpretations, or perspectives related to solving a problem
- Analyze the logical connections among the facts, goals, and implicit assumptions relevant to the situation
- Articulate the values affecting decisions, interpretations, and analysis made by ourselves and others

5. Computational Skills – The student will be able to:

- Identify and extract relevant numerical data from a problem/situation
- Obtain correct mathematical results and describe them

6. Citizenship – The student will be able to:

- Demonstrate involvement in the local and/or regional community
- Demonstrate understanding of a global concern and the ability to develop an informed opinion
- Demonstrate awareness of the impact of one's individual actions on regional, national, or global issues
