

IMAGINE WHAT YOU CAN DO... WITH GRANTS!

The Grant Development Office provides planning and strategic advice to Lake Superior College for external grants. The Director of Grant Development designs the grant development processes, the annual calendar, and timelines for public grants.

The Director of Grant Development leads and convenes processes for proposal design and development in coordination with department leadership. All public grants have a Principal Investigator or champion of the grant proposal who makes programmatic and budget decisions.

At the department level, the Director of Grant Development facilitates grant teams and works with them to develop proposal ideas, establish grant-writing timelines and refine their funding proposal.

When requested, the Grant Develop office researches new funding sources, identifies funding trends and researches specific funding sources for department specific needs.
