2017-2018
Lake Superior College and LSC Foundation
Annual Community Report

LEGACY: Celebrating the Leadership of President Patrick Johns
Financials: July 1, 2017 – June 30, 2018

Reserve Fund 2018: $11,063,506

Expenditures

- Operating Expenses: $12,194,200
- Personnel Expenses: $24,496,775
- Tuition and Fees: $16,895,363
- State Appropriations: $16,911,391
- Other: $3,363,130

Total: $36,690,975

Revenue

- State Appropriations: $16,911,391
- Tuition and Fees: $16,895,363
- Other: $3,363,130

Total: $37,169,884
Dear friends of Lake Superior College,

Thanks to your support and partnership, the academic year from July 1, 2017 to June 30, 2018 was one of the most successful years in the recent history of Lake Superior College.

In Fall 2017, enrollment increased by over two percent. We experienced significant gains in liberal arts and sciences for transfer and online programs, which saw four percent and 9.6 percent increases respectively. LSC served 10,263 students in fiscal year 2018 which included Postsecondary Enrollment Options (PSEO), College in the Schools (CITS), non-degree seeking students and participants in Continuing Education and Customized Training (CECT). LSC remains the number one college destination for graduating high school seniors in Duluth, Hermantown and Proctor.

New academic programs were added to the already 90+ programs available at LSC. The six-month Military Bridge Medic to LPN program was introduced to provide a pathway for military veterans who can now earn a practical nursing diploma in as little as six months. This is the first Minnesota Department of Veterans Affairs (MDVA)-approved practical nursing program for veterans with medical experience in the state.

New athletic programs were also introduced as we launched a co-ed cycling team and a co-ed clay target team, which joined the already successful men’s and women’s soccer programs. LSC’s clay target team had the top female shooter in the league in their inaugural year and the cycling team had a rider compete in nationals in Montana. Go IceHawks!

Several of our faculty and staff members received well-deserved state and national recognition. Math instructor Wendy Graves was honored in the 2017 Outstanding eLearning Faculty category at the ITC eLearning Conference in Tucson, AZ. Nursing faculty members Jacqueline Semann and Anna Sackette-Urness were honored as Outstanding Educators at the Minnesota State Board of Trustees Awards for Excellence in Teaching ceremony. LSC’s IT team was recognized by the Minnesota State system for their research, planning and implementation of the Airtame wireless air streaming for teaching and learning on the entire campus, including in more than eighty classrooms.

Our academic programs continue to gain national recognition as well. LSC’s cybersecurity program was ranked among the nation’s top 25 best online associate cybersecurity degrees. LSC’s online accounting program was ranked among the nation’s top 50 best online accounting degree programs. LSC’s practical nursing and professional nursing A.S. degree programs have been granted re-accreditation through 2025 from the Accreditation Commission for Education in Nursing (ACEN). And, after a year-long extensive evaluation process, Delta Airlines selected LSC’s aviation maintenance technology program as an approved partner. Congratulations to all our faculty, staff, students, community partners and alumni who have helped make our programs some of the very best available.

Through strong community support, the LSC Foundation had their most successful year to date in terms of both fundraising and scholarships distributed. The Foundation provided over $340,000 in student support through scholarships, grants and emergency loans. As enrollment continues to grow, so does the need for additional support – so thank you for helping invest in our students and our community’s future workforce.

As I prepare to retire as president of LSC, I am confident the institution is poised for continued growth and success for years to come because of all of you — our faculty, staff, students, community partners, donors and friends of LSC. It has been an honor to serve our college, our students, and our community with you. Thank you all for your continued support. Our success would not be possible without you.

Sincerely,

Dr. Patrick M. Johns
President, Lake Superior College
Lake Superior College President Dr. Patrick Johns has announced that the 2018/19 academic year will be his last as the leader of Duluth’s thriving community and technical college. After 42 years in the Minnesota State system, he will retire on June 30, 2019.

Dr. Johns began his tenure as the president of Lake Superior College in July 2010. He became the third president to serve LSC since the merger of the Duluth Technical College and the Duluth Community College Center in 1995.

Originally from Duluth, Johns said it’s been like a homecoming to return to the area and lead the institution. “I was very fortunate to have been selected as president of LSC, which allowed me to return to my hometown,” said President Johns. “The best part has been being able to work with so many great people to help fulfill the mission of the college and help serve our community.”

Prior to LSC, Dr. Johns served as president of Anoka-Ramsey Community College for twenty years. His education leadership roles also include dean of academic affairs at Minnesota West Community and Technical College; dean of academic and student affairs at Riverland Community College; and financial aid director, counselor, recruitment coordinator and an adjunct instructor at Mesabi Range Community and Technical College. Dr. Johns also was assistant men’s basketball coach at UMD.

Under his leadership, Lake Superior College has seen a resurgence in recent years which has included stable and balanced budgets, growing enrollments, and new academic programs and offerings aligned with regional workforce needs. The college has experienced consistent growth and expansion including the opening of the LSC Health and Science Building in 2012, as well as the addition of the LSC Integrated Manufacturing Downtown Center in 2014 and the LSC Center for Advanced Aviation in 2015. In 2018, work began at the LSC’s Emergency Response Training Center (ERTC) to enhance the fire training program. A multi-level burn box metropolis is being constructed in order for fire departments throughout the Midwest to get advanced real-world training at LSC’s facility.

**LEGACY: Celebrating the Leadership of President Patrick Johns**

President Pat Johns starts the demolition for a $5.266 million dollar state bonding renovation project in 2014 to revitalize numerous health and science classrooms, clinics, and laboratories.
In the fall of 2018, LSC reported the highest overall enrollment in over six years. The institution now serves over 10,000 students annually which includes total headcount of degree-seeking students, as well as students enrolled in Postsecondary Enrollment Options (PSEO), College in the Schools (CITS), non-degree seeking students and participants in LSC’s Workforce Development/Continuing Education and Customized Training (CECT). Part of the increase in overall enrollment is due to increases in new degree-seeking students (up 3.5%), international students (up 21.95%) and overall self-identified students of color (up 13.54%).

In his past nine years as president of Lake Superior College, Dr. Johns has helped increase the visibility and awareness for the institution through his involvement in the business community. Current and prior community leadership roles include serving on the Duluth Area Chamber of Commerce Board of Directors, board chair for Northwood Children’s Services, board member for APEX (Arrowhead Partnership for Economic Expansion), as a member of the Community Advisory Board for the University of Minnesota Medical School Duluth Campus, and a member of the Arrowhead Growth Alliance.

“My favorite part of the job has been the people I’ve gotten to know over the years,” said President Johns. “From our students and alumni, to faculty and staff, and all of our community partners, I am grateful for all those who have supported our success at Lake Superior College. We have worked together to make sure our programs align with changing community, employer and student needs. We know that a well-trained workforce is critical to regional economic development and that partnerships connecting LSC to the broader community are part of that success.”

In 2016, Dr. Johns and the college were recognized with the Finance and Commerce Progress Minnesota award. This statewide award acknowledged the work the college does with partnering with regional businesses to meet workforce skills and training needs. Lake Superior College was the only higher education institution in the state to receive this recognition.

Lake Superior College was recently ranked as the top community college in the state, and among the top twenty community colleges in the nation.

Under Dr. Johns’ presidency, Lake Superior College has also successfully added intercollegiate sports programs including men’s and women’s soccer, men’s and women’s basketball, co-ed clay target and men’s and women’s USA Collegiate Competitive Cycling.
The LSC Foundation has also continued to expand its scholarship base and endowment through strong community support during President Johns’ tenure. FY2018 was the most successful year in the history of LSC Foundation both in terms of funds raised and funding distributed.

Lake Superior College is poised for continued success for years to come, thanks to the leadership and legacy of President Pat Johns.

“It has been an honor to be part of this campus and this community,” said Dr. Johns. “It’s a difficult decision to retire, but it feels like the right time. I believe the future is very bright for LSC and our community.”

Thank you, President Johns, for your leadership and for leaving a lasting legacy.
Veterans or active duty service members with medic field experience can now earn a practical nursing diploma in just six months. In January 2018, Lake Superior College began offering the Military Bridge Medic to LPN program, the first Minnesota Department of Veterans Affairs (MDVA)-approved practical nursing program for veterans with medic field experience. It’s the first practical nursing bridge program of its kind to serve veterans in Minnesota.

“We’re pleased to work with Lake Superior College on this new initiative, helping vets apply their military medic experience towards a college diploma and a healthcare field,” said MDVA Director of Education and Employment Dave Bellefueille.

The program connects skilled job-seekers to a high-demand profession, says Deb Amys, director of LSC’s Nursing Program.

“We’re fortunate to have veterans who have valuable medical training and experience in our community. Offering a degree program that leverages their experience towards a career in nursing is a win-win for veterans and our whole community.”

Lake Superior College’s associate in accounting online degree was named one of the top 50 best online accounting programs in a national ranking by Masters of Finance.

Lake Superior College, ranked 37th in the nation, was recognized in part for offering an A.A.S. degree accounting program that includes coursework in personal finance and business law.

Based on information gathered in part from the National Center for Education Statistics College Navigator database, schools were identified that offered associate degrees in accounting as distance education options. The top 50 best online associates in accounting were then selected, using in-state tuition rates whenever available.
**2018 Awards Granted**

**DEGREES, DIPLOMAS, CERTIFICATES**
- Occupational Certificate: 424
- Associate in Arts Degree: 282
- Associate in Applied Science Degree: 222

Cybersecurity Degree Among Top 25 in Nation

Lake Superior College has been ranked among the nation’s Top 25 Best Online Associate Degrees in Cybersecurity. LSC was included in BestCollegeReviews.org’s annual ranking of the Top 25 Best Online Associate’s Degree Programs for 2018. The rankings were based on cost (less than $20,000), customization options, and other factors.

Lake Superior College also received a Center of Academic Excellence 2Y Designation from the National Security Agency and Department of Homeland Security for the nationally recognized Cybersecurity degree program.

Practical and Professional Nursing Programs Earn National Re-Accreditation

Lake Superior College received formal notification from the Accreditation Commission for Education in Nursing (ACEN) that LSC’s Practical Nursing and Professional Nursing A.S. degree programs have been granted re-accreditation through 2025.

Approximately 150 students graduate from LSC’s nursing programs every year. The majority of LSC graduates stay and work in the healthcare field in the Arrowhead region. LSC’s A.S. nursing programs were initially accredited in 2012 with the Practical Nursing program accredited in 2014.

“Our entire campus and our local health care clinical partners played a role in making this continuing accreditation possible,” said Deb Amys, LSC’s director of nursing. “The members of ACEN’s evaluation team were very impressed with our faculty, our students, our facilities and our industry partnerships.”

The Accreditation Commission for Education in Nursing (ACEN) is nationally recognized as a specialized accrediting agency for programs in nursing education. It accredits all types of post-secondary and higher degree education nursing programs.

Math instructor Wendy Graves was honored at the ITC eLearning Conference in Tucson, AZ with a national Outstanding eLearning Faculty award. Graves was nominated by her peers as an exemplary member of her community in the Instructional Technology Council’s (ITC) 2017 Outstanding eLearning Faculty category.

According to LSC’s Dean of Liberal Arts and Sciences Hanna Erpestad, this honor recognizes Wendy’s strong commitment to LSC’s online programming as a successful online developmental math instructor and online course designer. LSC’s popular online learning offers more than 135 courses and associate of arts, accounting, paralegal, and web and computer programming degrees available completely online.

To support student learning, Graves has produced quality lessons with Dreamweaver and accompanying demonstration videos for her students, which she has close-captioned to assure access for all learners. Graves also uses web conferencing tools, including AdobeConnect, to offer live tutoring for individual students. She has participated in LSC’s Program for Online Excellence in Teaching (POET) peer reviews and recently also earned Quality Matters certification for her Algebra I and Algebra II courses.

Wendy Graves Recognized with National Outstanding eLearning Faculty Award

Nursing Faculty Receive Minnesota State Outstanding Educator Awards

Nursing faculty members Jacqueline Semaan and Anna Sackette-Urness were honored as outstanding educators during the Minnesota State Board of Trustees Awards for Excellence in Teaching ceremony held in St. Paul in April 2018.

They were among the thirty-eight outstanding Minnesota State faculty members recognized for their instructional expertise, exemplary teaching strategies and service to their students, college and communities.

Sackette-Urness was cited for being a proven champion of revising nursing curriculum to ensure high-quality, hands-on instruction with her students becoming excellent nurses, problem solvers and critical thinkers. First-semester students often call her “Den Mom,” a title she embraces with responsibility and humility.

Semaan is known for her enthusiasm, seen as the spark that lights the fire of learning in her students. Admired as competent, compassionate and inspiring, Semaan uses effective and varied teaching strategies and methods to push her students to perform at the highest level.

The Awards for Excellence in Teaching were established in 2007 by the Minnesota State Board of Trustees to spotlight teaching and service faculty who prepare students for their professional, scholarly and civic lives.
Delta Air Lines Selects Lake Superior College as Approved Training Partner

After a year-long extensive evaluation process, Delta Air Lines selected Lake Superior College as an approved college partner in training future aviation maintenance technicians (AMTs). Delta TechOps evaluated numerous AMT schools throughout the country with a goal to find colleges that are committed to meeting Federal Aviation Administration (FAA) standards and Delta’s principles of excellence to help meet the high demand for aviation maintenance technicians expected over the next several years.

Lake Superior College’s Aviation Maintenance Technology program is a fully approved FAA program that prepares graduates to repair and maintain commercial and general technically advanced aircraft found in today’s market.

“We are excited to partner with Delta Air Lines,” said Dan Traska, director of LSC’s Center for Advanced Aviation. “The fact that LSC was selected from many aviation maintenance programs throughout the country speaks volumes about the quality of our program, our instructors and our community partners. This national partnership with Delta will open up even more career opportunities for our students, as well as continue to help promote both LSC’s aviation program and our community as a thriving aviation hub.”

IT Team Recognized with State Award for Airtame Wireless Classroom Update

Lake Superior College’s IT team received an award from the Minnesota State system in recognition of their research, planning and implementation of an Airtame wireless air streaming system for teaching and learning on the entire campus, including more than eighty classrooms.

Lake Superior College is the first higher education institution in the state to install and use the cost-effective Airtame system on the entire campus. “Airtame has instantly provided us an opportunity to turn any classroom into a collaborative learning space,” said LSC Chief Information Officer Steve Fudally. Students simply download an app which connects their computing device to the display. “Teachers and students may share their projects and ideas with the whole class from any location within the room streaming from any computing device.”

In use for more than a year at Lake Superior College, the Airtame system has worked out well in and out of the classroom. “Our IT staff can remotely manage the Airtame devices which has been a game changer for our frontline IT support,” said Fudally. “Airtame has resulted in our highest faculty and student satisfaction survey and a 75 percent reduction in help requests for IT support in classrooms.”

Airtame, based in Copenhagen, Denmark, is a crowd-funded company started in 2014 that makes a screen sharing device for schools and businesses. Their mission is to make it easy for people to share data and ideas without cables, so you can work without limits. They have featured their partnership with Lake Superior College on their website, airtame.com.
Lake Superior College Athletics Expands, Adds Co-Ed Clay Target and Co-Ed Cycling

LSC Clay Target Team Debuts with First Place Finish, Top Female Shooter in Division

Lake Superior College hired clay target champion and seasoned coach George Pappas as the inaugural coach of the LSC clay target team. Pappas brings more than 39 years of experience in clay target shooting and has won more than 200 trophies in state and national competitions. Pappas led the LSC IceHawks to an impressive first place finish in the eastern division in their debut season.

LSC Men’s Soccer Make Deep Playoff Run in Third Season, LSC Women’s Soccer Make First-Ever Playoff Appearance

In their third season, the LSC men’s soccer team finished on top of the Minnesota College Athletic Conference (MCAC), made an impressive run deep into the playoffs, and earned the right to host the Region XIII Championship. The Icehawks finished as Region XIII Runners-Up, losing in the championship game to Anoka Ramsey 0-1. Also in their third season, LSC’s women’s soccer earned their first-ever trip to the post-season before falling to the Rochester Yellowjackets 2-1 in the first round of the Region XIII playoffs.
LSC Cycling Wins National Bid in Inaugural Season

Greg Daw was named the inaugural coach of the co-ed cycling team and led the IceHawks to an impressive first season. LSC Cycling immediately earned impressive victories right out of the gate as Andrew Smith won the very first race the team competed in, earning the men’s short track cross country title at Spirit Mountain. Max Fierek followed by winning the enduro race and Edison Foster finished in third. The IceHawks competed well all season, and Max Fierek earned the right to represent Lake Superior College and compete at the USA Cycling Collegiate Mountain Bike National Championships in Missoula, Montana. Max was also named the LSC 2017/18 Student-Athlete of the Year.
Celebrating a Historic Year for the Lake Superior College Foundation

Fiscal year 2018 was the most successful year to date for the Lake Superior College Foundation in terms of both fundraising and scholarships distributed. The LSC Foundation provided over $340,000 in student support through scholarships, grants and interest-free emergency loans. More than four hundred students received financial support from the LSC Foundation.

LSC Foundation Launches Capital Campaign

As enrollment continues to grow at LSC, so does the need for additional support. That’s why in the summer of 2018, the LSC Foundation launched a multi-year capital campaign to increase capacity to support even more students and continue to help address our region’s workforce needs. Through contributions, grants, equipment donations and other giving, over $1M was raised in the first year of the campaign. To learn more and to support the campaign, please visit, lsc.edu/donate.

LSC Foundation hosted a donor appreciation event on September 12, 2017. Guests enjoyed a beautiful evening on the deck of Pier B, followed by an hour cruise onboard the Sundew, the retired Coast Guard cutter.

The annual LSC Foundation Golf Outing took place at Nemadji Golf Course in Superior, WI on August 9. The event raised over $20,000. Pictured above radio personalities Justin Michaels of 98.9 KTCO and Jason Manning of KQ95 at the 2017 LSC Foundation Golf Outing.

The 2018 Vine & Dine Gala was held at the Clyde Event Center on March 29, 2018. About 200 people attended the event which raised $30,000 for student scholarships. Pictured left are LSC Foundation Executive Director Daniel Fanning with several scholarship recipients.
Fourteen students in high-demand career tracks at Lake Superior College were awarded $2,500 scholarships through the Workforce Development Grant program, funded by the 2017 Minnesota Legislature. The grants are part of a pilot program funded by the state, and administered through the LSC Foundation. The program is designed to help students in the Minnesota State system launch careers in high-demand occupations in Minnesota, while helping local employers fill growing workforce needs. The fourteen students were all enrolled in one of the identified areas of studies: Advanced Manufacturing, Health Care Services, Agriculture, and Information Technology.
